

# Improve Cloud Endpoint Protection

## Microsoft Intune Pilot

Want to manage the influx of endpoint devices more efficiently, reduce complexity, improve visibility, lower costs, and enhance security? More and more companies are choosing Microsoft Intune.

And we can show you how.

# +60%

Growth in the number of Windows, Android, and iOS devices protected by Microsoft Intune year over year.

With the wide range of device types used in today's business ecosystem, having a consistent way to manage them while protecting sensitive data is essential. Microsoft Intune works across multiple device platforms, simplifying endpoint management while protecting hybrid and frontline workers.

## Experience first-hand what Microsoft Intune can do for your organization

A Microsoft Intune pilot, led by our team of experts, will give you a deeper understanding of how Microsoft Intune can help improve your overall endpoint protection, increase productivity, and provide a better experience for your end users – onsite and remote.

### What's covered

Series of 6 collaborative workshops:

- Overview of Microsoft Intune
- Microsoft Intune configuration
- Device enrollment and configuration policies
- Application management and deployment
- Compliance policies and regulatory considerations
- Management of remote devices
