

Provide your workforce with a secure and productive desktop experience from anywhere

Windows 365 Pilot

Hybrid work creates new challenges and new opportunities. With Microsoft Windows 365, you can provide users with a full Windows 11 experience that's personalized, powerful, simple, and secure — on any device streamed from the Microsoft Cloud.

Let us show you how.

74%

of U.S. companies are using or plan to implement a permanent hybrid work model.

As the world of work evolves to support more flexible working styles, organizations need to enable users to be productive and secure from anywhere, on any device, without compromising IT security. Windows 365 unlocks enterprise hybrid work scenarios to deliver a secure and productive desktop experience from anywhere.

Get set up quickly with Windows 365 and easily provision Cloud PCs

A Windows 365 pilot, led by our team of experts, will demonstrate features and functionality that you can leverage to provision and manage Windows 11 Cloud PCs throughout their entire lifecycle.
