

Maximize your Microsoft 365 investment with Inviso's expertise

You want to harness the full power of your Microsoft 365 suite. You've invested in the right tools, but is your digital environment as secure as it could be? Enter: Inviso.

We'll partner with you to build a roadmap to reach every maturity waypoint on your Microsoft 365 journey. With our deep subject matter expertise, we'll help you enable and activate all the robust security and governance features available within the Microsoft 365 platform.

Identity & threat protection

We'll analyze your Microsoft Entra tenants to be sure you're taking advantage of features like on-premises Active Directory synchronization, conditional access, privileged identity management, single sign-on, and Microsoft Defender for Identity.

Device & apps management

With our help, you'll amp up your current security posture with tools like Microsoft Intune, BitLocker, LAPS, and Defender for Endpoint. We'll even develop an adoption and migration plan for point solutions.

Information protection & governance

We'll introduce you to toolsets like sharing policies, lifecycle management, and data governance—so you can feel in control of your data and be ready to *sprint* with Microsoft Copilot.

Where are you on this journey? We'll meet you where you are.
